

WEBSITE PERFORMANCE REPORT

Traffic Baseline

A snapshot of the current website's traffic, captured before the new site goes live, so we can measure the growth it delivers.

July 2026	Jul 2025 – Jun 2026	Organic search

THE SHORT VERSION

Your website draws **about 166 visits a month**, and **two of every three come from Google search** — people in Arkansas actively looking for shower doors, mirrors, glass railings, storefront glass, and glass repair. Organic search is the engine of the site, and the goal for the new one is simple: grow it **25%**. This report is the "before" line we will measure that against.

THE GOAL

Grow organic search traffic by 25%

110 → 138

That is about **28 more high-intent local visitors every month**, roughly **330 more per year** — all people actively searching for the work you do.

Why 25%? A realistic 12-month target for a rebuild plus local-search work — the floor of the typical 20–50% range, so it's a goal we beat, not chase.

The picture

Monthly visits, organic vs. everything else

Each bar is one month (Jul 2025 – Jun 2026). The green portion is organic search.

HOW WE GET THERE

What drives the +25%

Every lever below is built into the new website.

01

A faster, modern site

Speed is a direct ranking factor. The new site is lean static pages instead of the heavier Wix setup it replaces.

02

Pages that match real searches

Five service pages plus eleven city pages (the metro + Hot Springs, Greers Ferry, Bentonville) give Google a strong page to rank for each search.

03

Search & local data built in

Structured data, unique titles on every page, a clean sitemap, and 301 redirects that preserve existing link equity.

04

Clean measurement in place

GA4 + Search Console connected; overseas bot traffic blocked at the edge so what we report is real customers.

Traffic breakdown

"Organic search" = visitors who found you through a search engine. "Direct" = typed your address or used a bookmark. "Referral / other" = links from other sites.

WHAT WE NEED FROM YOU

One thing moves the needle most

Ask happy customers for a Google review

★ The biggest lever on searches like "glass company near me" is your Google Business Profile in the map results, and reviews are its fuel. You sit at 3.9★ across 38 reviews — and your recent reviews are 5★; the average is dragged by old ones. If everyone who gets an install is asked for a quick review, the rating and the map ranking climb together — calls the website alone cannot buy.
